Summary

This bulletin provides information about the operation of the Northeast Order during 2017 through a series of tables and charts. The *Bulletin* Highlights section summarizes order events that occurred during 2017. Also included are lists of handlers and cooperatives operating under the Order with their respective locations depicted on a map of the region.

Milk Volume Sets New Record

The volume of milk received from producers shipping to handlers regulated under the Northeast Order continued to grow during 2017, and set a new record high for the Order with 27.4 billion pounds, an increase of 1.7 percent from 2016. Total volume has been on an upward trajectory for the past eight years.

The year ended with 158 fewer producers than at the end of 2016. This was less than the previous 5-year average decline of 309 producers per year. Annual average daily deliveries per producer (DDP) equaled 6,722 pounds, an increase of 4.4 percent from 2016 and a new record high. Even with a continued strong supply of milk and demand struggling to keep pace, prices improved from the previous year, averaging 9.7 percent higher than in 2016.

Class Utilization Changes

Class I utilization averaged 32.1 percent in 2017, a decrease of 0.6 percentage points from the previous year. Although the total volume of milk used in Class I continued to drop, its rate of decline appears to have leveled off. The volume in 2017 was only 29.5 million pounds less than in 2016, down only 0.1 percent. During 8 months of 2017, Class I volume surpassed the same month of the previous year. The total volume of producer receipts used in Class II declined slightly from 2016 (8.7 million pounds), but when adjusted for leap year was actually a slight increase of 0.1 percent (on a daily average basis). Overall, Class II utilization was 23.9 percent of total producer milk receipts, a decline of 0.4 percentage points as more milk went to classes III and IV.

Class III volume rose 4.1 percent and ended the year with the third largest total since the Order's inception; the only two years higher were 2001 and 2002. Utilization averaged 26.0 percent, up 0.6 percentage points from 2016. The amount of milk used in Class IV grew 3.8 percent and set a new record high for the Order. It accounted for an annual average of 18.0 percent utilization.

Prices Higher Than 2016

As previously mentioned, milk supplies again were plentiful during 2017. Butterfat demand was strong and reflected in record-high butter prices during the year.

Commodity Prices—The National Dairy Products Sales Report (NDPSR) reported record-setting butter prices every month during 2017 except April and December. The year finished with a \$2.3303 per-pound average butter price, 12.2 percent higher than in 2016. Cheese prices were slightly above last year and close to the average in 2015. NDPSR prices averaged \$1.6344 per pound for 2017, up 1.8 percent from 2016. Nonfat dry milk prices started the year strong but fell considerably by year-end. They averaged \$0.8666 per pound in 2017, 4.5 percent higher than the previous year. Dry whey prices followed a similar pattern as nonfat dry milk, higher early in the year and weaker near the end, averaging \$0.4437 per pound, an increase of 54.3 percent from 2016.

Component Prices—All component prices averaged above the previous year except protein, which was affected by the higher butterfat price that is part of the protein price formula. The price paid to producers for butterfat averaged \$2.6143 per pound, up 13.3 percent from 2016 and the highest reported since the Order's inception in 2000. The per-pound annual average protein price was \$1.8682 per pound, second lowest in the Order's history, and a decline of 10.8 percent from 2016. The other solids price averaged \$0.2519 per pound, a jump of 177 percent from the previous year. The nonfat solids price averaged \$0.6918 per pound, 5.6 percent above the 2016 price.

Class Prices—For the most part, the higher component prices translated into higher class prices, which were about 9-12 percent above the previous year's. The Class I price averaged \$19.70 per hundredweight (cwt) in 2017, up 9.1 percent from the 2016 average. The Class II price averaged \$16.04 per cwt, an increase of 11.8 percent from the previous year. The Class III price averaged \$16.17, up 8.7 percent from 2016. The Class IV price rose to \$15.16, a jump of 10.1 percent. Overall, the statistical uniform price (blend) reported at Suffolk County, Massachusetts (Boston) averaged \$17.44 per cwt, 9.7 percent above the 2016 average.

Producer Tests

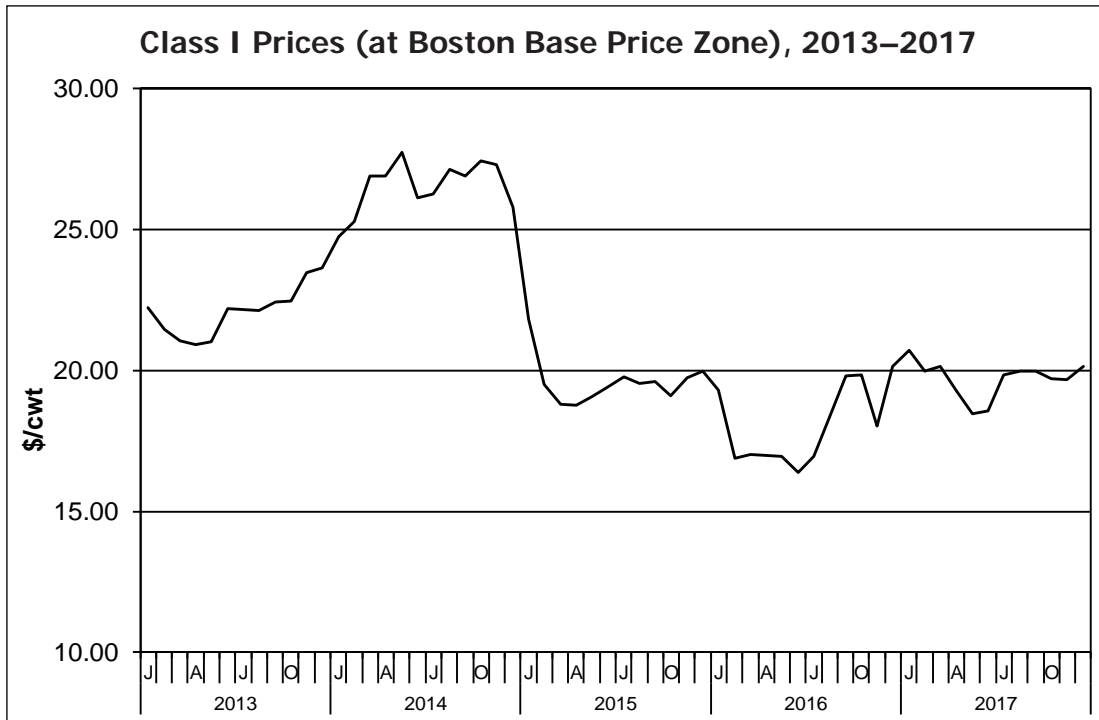

The annual average producer butterfat test equaled 3.86 percent in 2017, up 0.05 points from the previous year, setting a new Order record high. Records were set during 11 months and tied in one. The annual average producer protein test was 3.10 percent, up 0.01 point from 2016 and a new record for the Order. The producer other solids test remained at the record-high average of 5.75 percent, unchanged from the past two years.

* Producer receipts data based on audited producer payroll reports of pooled producers. Totals may not add due to rounding.

** Counties with fewer than 3 producers are restricted and have been consolidated into the "all other" category. Some counties had more than 3 producers, but had fewer than 3 handlers pooling milk during the month.

*** Represents restricted data for the states of Delaware, Indiana, Michigan, Minnesota, New Jersey, North Carolina, Ohio, Rhode Island, West Virginia, and Wisconsin.

* Producer receipts data based on audited producer payroll reports of pooled producers. Totals may not add due to rounding.

** Counties with fewer than 3 producers are restricted and have been consolidated into the "all other" category. Some counties had more than 3 producers, but had fewer than 3 handlers pooling milk during the month.

*** Represents restricted data for the states of Delaware, Indiana, Michigan, Minnesota, New Jersey, North Carolina, Ohio, Rhode Island, West Virginia, and Wisconsin.

* Producer receipts data based on audited producer payroll reports of pooled producers. Totals may not add due to rounding.

** Counties with fewer than 3 producers are restricted and have been consolidated into the "all other" category. Some counties had more than 3 producers, but had fewer than 3 handlers pooling milk during the month.

*** Represents restricted data for the states of Delaware, Indiana, Michigan, Minnesota, New Jersey, North Carolina, Ohio, Rhode Island, West Virginia, and Wisconsin.

Bulletin Highlights — 2017

January

The Northeast Order pooled milk from 48 different cooperative milk marketing associations holding USDA Capper-Volstead cooperative determinations during October 2016. Producer count, milk volume, geographical distribution, and average size of cooperative members and nonmember (independent) producers were compared. Maps illustrated geographic distribution of cooperative member and nonmember producers pooling milk on the Order in October 2016. A table compared nonmember and member producers and average volume pooled on the Order for select states in October 2016.

February

Milk production, cow numbers and production per cow were compared for the U.S. and Northeast milkshed for 2016. A table showed the top ten states ranked by milk production for 2016.

A summary of the 2016 market service program was discussed. An overview of the calibration program was given, as were the results of tank checks/calibrations. A chart illustrated tank checks and calibrations by tank size for 2016. A table announced the tentative calibration truck schedule for 2017.

The USDA announced its recommended decision to establish a California Federal Milk Marketing Order based on the evidentiary record compiled from a public hearing held from September to November 2015. The recommended decision was published in the Federal Register February 14, 2017.

March

The Federal Order monthly Pool Price Announcement reports a Statistical Uniform Price (SUP) that represents a benchmark minimum price paid to dairy farmers, along with a SUP at the average pool component tests for the month. Differences between the two price structures were compared and discussed. Charts illustrated a 12-month moving average of the difference between SUP standardized tests versus SUP pool tests and average pool butterfat and protein tests from 2007 through 2016.

Changes in rankings and the proportion of farms and daily deliveries per producer (DDP) in the top ten Northeast Order counties in 2016 were discussed. A table showed milk production, number of producers, and average DDP in the top ten counties pooling on the Northeast Order for 2016.

A pool summary for all federal orders was given in a table for January–March, 2016 and 2017.

April

A market situation update reported SUP at the Boston, MA, zone average for January through April 2017, and a projected average for 2017 using the Chicago Mercantile Exchange's (CME) Class III and Class IV milk futures prices. U.S. milk production trends and consumer demand indicators were discussed. A chart showed the CME daily spot prices for 2017.

The USDA's National Agricultural Statistics Service (NASS) released their *Dairy Products 2016 Summary*. Changes in national cheese production, other products, and percent of total milk production were compared to the Northeast Order. A table highlighted selected products' changes from 2015 and 2011, and a comparison of Northeast Order milk used in the manufacture of these products in 2016.

May

Total volume of packaged fluid milk sales in the Northeast Marketing Area has been on a constant decline since the Order's inception. A table showed changes in fluid packaged sales for January through May, 2012 through 2017, and annual changes 2012 through 2016. A chart illustrated NASS butter and federal order butterfat prices for January through May, 2000 through 2017.

The trend of each month's total pool volume of milk surpassing the same month of the previous year has resulted in record-setting volumes that caused pool handlers to face difficulty balancing all of the milk pooled on the Order since November 2015. A discussion was held on the changes in utilization in other classes for the first 5 months of 2017 compared to the same period 5 years ago.

In May 2017, a 35-cent increase in the Class III price, while the Class I price dropped 85 cents, contributed to a decline in the producer price differential (PPD) level that resulted in negative PPDs for differential zones below \$2.40. For the month, 23.3 percent of the milk pooled on the Order was received at plants in these zones.

June

The combination of higher butterfat tests and prices in 2016 and 2017 resulted in a higher butterfat proportion of the SUP. A table showed the contribution

(Continued on following page)

Bulletin Highlights – 2017 (continued)

of total gross payment received by producers for the month of June, 2007, 2012, 2016, and 2017.

The SUP at the Boston, MA, zone averaged \$17.28 per hundredweight (cwt) for January through June 2017. Using CME Class III and IV milk futures prices, the SUP projected to average \$17.81 per cwt for the year. U.S. volume and value of exports, along with other demand factors and the supply side, were analyzed. A table showed actual and estimated Northeast Order uniform prices from June through December 2017. A chart displayed CME daily spot prices for 2017.

A pool summary for all federal orders was given in a table for January–June, 2016 and 2017.

July

Total utilization of milk in the Northeast Order was up 2.6 percent for the first 6 months of 2017, compared to the same period in 2016. Comparisons were made on the milk used for specific products within manufacturing classes (II, III, and IV) based on handlers' reporting of how milk was used. A table showed changes in selected products in the Northeast Order utilization versus U.S. dairy products manufactured from January through June, 2016 and 2017.

The July pool volume grew by almost 4.5 percent over a record volume the previous year and marked the 21st consecutive month in which a record for the respective month was set. Charts illustrated the Order's average daily pool volume during the current year versus the previous year and year-over-year growth in DDP from January 2015 to July 2017.

August

The Northeast Order had the largest volume of milk utilized for Class I (fluid drinking milk), accounting for about 22 percent of all federal order Class I volume. A discussion compared Class I utilization in federal orders. A table showed Class I volume and utilization percentages for all federal orders for January 2012 through June 2017.

For the third time since the Order's inception, the August butterfat component price surpassed \$3.00 per pound. A chart illustrated 12-month averages for butterfat prices and the Order's pool butterfat component tests from January 2001 through 2017.

For the first 6 months of 2017, organic milk pooled on the Order grew 5.2 percent from 2016. A chart displayed the Order's organic pooled volume and sales for January through June, 2013 through 2017.

September

Producer butterfat and protein component tests set new record-high levels nearly every month for the past year in the Order. A discussion compared levels of current butterfat and protein tests and volumes since the Order's inception. Charts illustrated producer butterfat and protein tests from 2000 through 2017.

Reportedly, lower than average monthly nonfat dry milk (NFD) prices prevented a substantial SUP recovery. A discussion was held and a NFD price outlook was given. A chart presented recent monthly NFD prices and the corresponding Northeast Order SUP from 2010 through 2017.

A pool summary for all federal orders was given in a table for January–September, 2016 and 2017.

October

Milk delivered to plants located in the \$2.50 and below differential zones received a negative PPD for the month of October. Current PPD dynamics were discussed. A chart illustrated average percent utilization for the four classes for the first 10 months of the year for 2000 and 2017. A table presented the total volume of milk pooled and the total milk pooled by class and differential zone for the month of October 2017.

Northeast Order producer milk pooled by class surpassed the same month previous year for a majority of the months in all classes for 2017. A table showed the Order's 2017 utilization for selected products for January through October.

November

The Northeast Order SUP was forecast for 2017 and 2018. Demand and supply factors were analyzed for 2017 and predicted for 2018. A chart displayed actual and estimated milk, corn, and diesel prices from 2009 through 2018.

A calendar showed the 2018 dates for partial payments to producers who are not members of cooperatives. The Order requirement was explained.

December

Selected Northeast Order statistics for 2017 were summarized, and a table compared the Order's pool statistics for 2016 and 2017. A chart illustrated the Order's pool volume, number of producers, and DDP for 2000 through 2017.

A pool summary for all federal orders was given in a table for January–December, 2016 and 2017.

USDA Equal Opportunity Policy

In accordance with Federal civil rights law and The U.S. Department of Agriculture (USDA) civil rights regulations and policies, the USDA, its Agencies, offices, and employees, and institutions participating in or administering USDA programs are prohibited from discriminating based on race, color, national origin, sex, gender identity (including gender expression), sexual orientation, disability, age, marital status, family/parental status, income derived from a public assistance program, political beliefs, or reprisal or retaliation for prior civil rights activity, in any program or activity conducted or funded by USDA (not all bases apply to all programs). Remedies and complaint filings deadlines vary by program or incident. Persons with disabilities who require alternative means of communication for program information (e.g., Braille, large print, audiotope, American Sign Language, etc.) should contact the responsible Agency or USDA's TARGET Center at (202) 720-2600 (voice and TTY) or contact USDA through the Federal Relay Service at (800) 877-8339. Additionally, program information may be made available in languages other than English. To file a program discrimination complaint, complete the USDA Program Discrimination Complaint Form, AD-3027, found online at http://www.ascr.usda.gov/complaint_filing_cust.html and at any USDA office or write a letter addressed to USDA and provide in the letter all of the information requested in the form. To request a copy of the complaint form, call (866) 632-9992. Submit your completed form or letter to USDA by: mail: U.S. Department of Agriculture Office of the Assistant Secretary for Civil Rights 1400 Independence Avenue, SW Washington, D.C. 20250-9410; fax: (202) 690-7442; or email: program.intake@usda.gov. USDA is an equal opportunity provider, employer, and lender.
